## INCREASED COST OF LIVING IS CAUSING ALARM IN GERMANY

Markets Are Poorly Supplied and as Result Prices Asked Are  
Exorbitant—Troops Called Out to Protect Mer-  
chants—Many at Starvation's Door

(Special to the Capital.)  
Berlin, Sept. 23.—The increasingly  
high prices of provisions is a cause  
of grave alarm. Complaints are heard  
from every part of the empire, but  
nearly from the poorer classes, but  
from the population generally.  
Within a few weeks milk has materi-  
ally increased in price owing to the  
scarcity of fodder for the live stock  
caused by the draught. In many sec-  
tions of the country, sugar beet, the  
staple commodity, as well as the  
cabbage, potato, and other crops, have  
been seriously damaged, and in some  
instances practically ruined by the  
recent heat period.  
The markets are poorly supplied  
with vegetables. Housewives are hi-  
tlerily lamenting the almost two-fold  
increase of the usual price of vege-  
tables, potatoes in particular costing  
now from \$1.25 to \$2.50 per cwt., or  
just double what they cost last year.  
Moreover, the prices are expected to  
rise still higher.  
Meat is generally not as much  
higher than usual, but increased prices

## GREATEST INFUX OF AMERICANS AT LONDON

Record Month for Travelers and Regular Trippers at World's  
Greatest Metropolis Is Reported, and All Caterers  
Are Doing Thriving Business

(Globe Cable Service.)  
London, Sept. 23.—There were more  
Americans in London this week than  
has ever before been known during the  
month of September. The increase is  
estimated by traffic experts and hotel  
keepers at nearly one hundred per  
cent, and the tide is still flowing this  
way with but few indications of a

turn in the other direction for some  
time to come.

The greater part of this unexpected  
American invasion is made up of those  
Gorham visitors and regular trippers  
who were frightened by the talk  
of high prices last June into passing  
by England and spending the summer  
on the continent. The scare having  
subsided, they are now flocking to  
London for a few weeks of sight-  
seeing or social visits on their way  
home. Every channel steamer from  
French and Belgian ports is crowded  
to the limit by the migration, while  
the hotels in the Strand and the West-  
end are reaping a rich harvest of  
American dollars. At the larger hotels  
fully 50 per cent of the guests were  
American, while even the smaller  
hotels and apartment houses were  
severely taxed.

The fashionable restaurants, as well  
as the shops and stores, also received  
their share of American patronage,  
though the purchases were neither so  
large nor so lavish as last year. This  
is attributed chiefly to the fact that  
their continental sojourn has left the  
visitors with more or less depleted  
purses. The sightseers are out in  
full force and practically monopolized  
most of the available taxi-cabs and  
motor omnibuses, while the streets  
and even the byways of the West-  
end, especially towards evening  
are thronged with alert, eager-eyed  
Americans. Places of amusement are  
doing a thriving business, and also  
the exhibitions at Earl's Court, the Crys-  
tal Palace, at Shepherd's Bush.

The banking departments of the  
principal tourist offices are compelled  
to work overtime to meet the manifold  
demands of visitors who want cheques  
and letters of credit cashed or contin-  
ental money changed into coin of the  
realm. Short-trip tickets to neigh-  
boring places of interest are in great  
request.

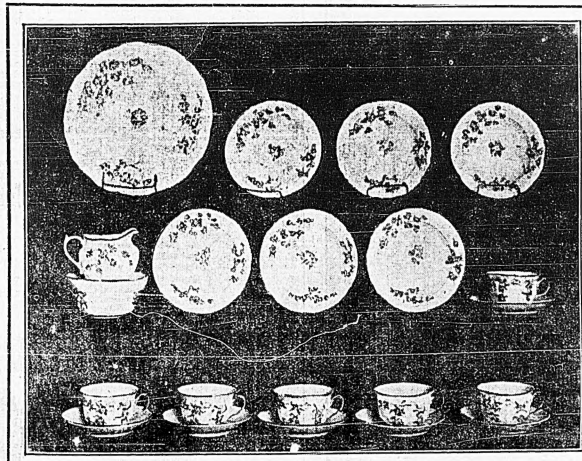

"We have never before experienced  
such a rush of American travelers at  
this time of the year," unaccountable  
official. "It is really unaccountable  
as a whole, unless it is due to the  
growing popularity of London as a  
summer resort among our wealthy  
cousins on the other side of the  
pond." It is quite true that many  
of the arrivals are returning from the  
continent to spend a part at least,  
if not the whole of their vacation in  
leaving here last spring by the Cor-  
onation scare, but there are plenty of  
others who are coming here for the  
first time, and of these a goodly pro-  
portion have come to stay.

"This decision is clearly evidenced  
by their desire to buy or lease perma-  
nent homes here. During the past few  
days we have had an astonishing num-  
ber of inquiries for suitable home  
sites and residential properties both  
in London and in the country, and  
every instance they want to buy or  
lease for a term of years. Every  
season brings a larger quota of the  
millionaire house-seekers, in addition to  
a remarkable increase of autumn trippers.  
So, you see, the American invasion  
of London is not really due to a  
great deal of harm after all. It only  
delayed their visit a bit, so far as  
the Englishmen are notably good  
at waiting for the inevitable."

### POWER EMPLOYEE DEAL.

(Western Associated Press)  
Niagara Falls, N. Y., Sept. 22.—Pat-  
rick Farmer, a former president of the  
Ontario Power company, was found  
in a ditch on Fourth street this morn-  
ing with a broken neck.  
It is not known how he came to be  
there, but it is thought that he fell  
into the ditch while refusing help in-  
tended.

## EARLY EDUCATION TO BE ELABORATE

6-YEAR-OLD CHINESE EMPEROR TO  
STUDY SOCIAL, ECONOMIC AND  
INTERNATIONAL QUESTIONS

(Globe Cable Service.)  
Shanghai, Sept. 23.—The details of  
the scheme to be followed with regard  
to the education of the Emperor  
Hsuan-Tung, now in his sixth year,  
make interesting reading for those who  
appreciate the influence that his Ma-  
jesty's early training may exert upon  
the development of China.  
His age, according to a recent decree  
of the Empress Dowager, is "the one  
most amenable to good impressions,"  
and the program that has been mapped  
out suggests that he is to lose no time  
in acquiring them in a very varied  
form. Three teachers are to instruct  
him morning and evening, while his  
afternoons are to be devoted to prac-  
tice in penmanship.  
His tutors have been ordered to  
submit for approval the names of some  
clever boys to share his studies.  
An elaborate schedule of lessons is  
now being prepared, but the decree has  
already announced the lines on which  
his instruction is to proceed. His mil-  
lions of subjects, 400,000,000, and Mr. Thomas

Healy, spirit grocer, Tralee, who re-  
ceived 573 votes, and was declared  
elected with a majority of 113 votes.  
At the elections in 1908 Mr. Healy de-  
feated Mr. Donovan by 74 votes. The  
pollsters are four in number—James  
Goffey, John Curran, Patrick Walsh,  
and William Donovan—add bribery,  
treating, and undue influence are al-  
leged. One of the items under treat-  
ing is that the respondent is said to

have promised a number of voters  
that if he were victorious he would  
give a dance with free drinks at the  
house of Patrick O'Leary.

# HOPETO DEFEAT ENDS OF THE STOCKBROKERS

International Institute of Agriculture Would Keep the Farmer Constantly Advised as to Supply and Demand and Price of All Grains and Market Prices

(Clobe News Cable) (By G. A. Russell)  
Rome, Sept. 23.—The 1st General Assembly of the International Institute of Agriculture held at the Hotel de Ville, confirmed the excellent progress made by the institute during the last year, and passed a number of resolutions which should have an important effect upon its work in the future. Some of these resolutions have been adopted by an immediate vote, notably those that deal with the necessity of uniformity in method of international reports, and it is to be hoped that within a very short time the main object of the institute may be fully realized.

The question raised as to the method of reporting the condition of growing crops caused considerable discussion. It was stated by the general assembly in a resolution adopting the system of "single numerical statement" advocated by the American and English delegates. The decision was not altogether unanimous, since two nations opposed the system, which was supported by 11. Unfortunately the opponents happened to be France and Russia, and this want of entire unanimity is rather serious. In the case of France the only obstacle alleged is the necessity of changing the present system of crop reporting. It is admitted, however, that this change can be easily made, and, as the French authorities have professed themselves favorably inclined to the change, there is reasonable hope that France will soon come into line, unless, of course, she may prefer for other reasons, to wait for the concurrence of Russia.

**Inaccuracy Not Unwelcome**  
It has been suggested that a want of precision in the reports on growing crops is not altogether unwelcome to the Russian government, which sometimes uses inexact estimates to evade the blows which reports of bad harvest prospects may inflict upon its credit. Whatever may have been the case in the past, one can hardly believe that any Russian ministry to-day would resort to such a dishonest and impolitic course of action, a course that is a good deal more detrimental

to the interests of the Russian producer than helpful to the financial credit of the country.

The amount of surplus stocks, left over from previous harvests and stored in the farmers' hands, is naturally a not unimportant item in the formation of prices, especially in large grain-producing countries. Efforts have been made in Canada and the United States to obtain figures as to these stocks, and last year the semi-annual German council of agriculture (Landwirtschaftlicher) made a report on them for the German empire. The general assembly has issued a circular inviting the governments who adhere to the international institute to submit yearly reports of any surplus producers' hands—of wheat, rye, barley, oats and maize. This yearly report should be made so as to coincide with that of the probable yield of growing crops, about a month before the harvest.

**Shipping Falls to Tally**  
Another matter which occupied its attention was the accuracy of statistics of exports and imports. There are generally vast discrepancies between the figures for exports as given by the exporting countries and as registered by the importing countries. Two years ago the permanent committee of the international institute made an inquiry into the question, and its report was laid before the general assembly. It would appear that these discrepancies are due to the undeclared declaration of cargoes in transit; also to the registration of exports and imports under different classifications according to the varying rules which exist in the customs administrations of various countries. A proposal was made by the French delegate to adopt a system of voyages, to be issued by the customs house from which the goods started and given up to the customs-house where they were discharged—such a system, in fact, as is employed by the present railway regulations for establishing correct statistics of passenger traffic on international railways.

It was feared, however, that this might prove impracticable in the case of commerce, and it was decided that the permanent committee should continue its inquiries and report again, limiting its recommendations to the case of wheat only. It is still not impossible that the proposal of the French delegate may be brought forward and finally adopted, as it found a good many influential supporters among the other delegates.

It is obvious that the collection and publication of statistics by the international institute, if it is to be of any use, must be accurate and thoroughly carried out, is of a stage when it can, and does, supply promptly, the knowledge, which would otherwise be wanting, of the world over and prevent the creation of fictitious prices by speculation. But unless that knowledge is quickly disseminated it remains of little avail. The Canadian government has fully realized this fact, and is at considerable pains to publish at once, either in the press or its own publications, the intelligence which it receives; with the result that Canadians in every quarter of the country are kept in constant touch with the centre of information in Rome.

## MUCH DRUNKENNESS IN CITY OF LONDON

White Country Shows Decrease Main City of Empire Shows Increase in Number of Inebriates (International News Service)

London, Sept. 21.—The year's record for drunkenness in London takes an unfavorable exception to the general decrease which has occurred all over the country.

The statistics now issued of the number of convictions for offenses against the licensing law during 1910 show that, although the total decrease in England and Wales of 7,526 convictions, or 3.44 per cent., is spread all over the country, the metropolitan police district is a notable exception with a total of 38,471 convictions, which represents an increase of 7.94 per cent.

The down ward movement in convictions for drunkenness, which has been in progress for some time, says the report, "continued during last year, but at a slower pace than was observed in 1909. There were 161,292 convictions, as compared with 169,518 in the previous year.

The convictions of females for drunkenness did not decrease at the rapid rate of 1909. The decrease in the total number of convictions in 1910 was 2,151, as against 4,254 in 1909.

As regards the convictions for drunkenness in proportion to the population, the report states that in the year 1910 there were 49 persons convicted for every persons in England and Wales.

**AN EVENING IN JUNE.**  
Through the woodland shade the night-males are calling.

Calling through the twilight from the shadowy trees:

On the evening air their golden song is falling.

Liquid, lovely echo borne upon the breeze.

Vaguely through the dusk now woodland was strewn gleaming.

'Midst the undergrowth tall bluebells straightly stand:

Flawless of spot, blossom wholly now are dreaming.

Sweet the brooding mystery of the evening land.

Everywhere lies beauty, everywhere sounds singing:

When the cuckoo calls faintly over the hill,

Wraith-like thrush—on the shadows blue music winging.

Drowned beneath the nightingale's rich, triumphant trill.

## BRAIN PIERCED BY UMBRELLA POINT

PROMINENT CITIZEN, CAMPBELL-TON, R.D., DEAD AS RESULT OF ELECTION QUARREL.

(Special to the Capital)

Campbell, N. B., Sept. 23.—Campbell town is today mourning for one of her most respected citizens, Mr. P. D. Bruce, who died at an early hour this morning as a result of a blow struck him by Dr. W. W. Docherty.

It appears that Mr. Bruce and Dr. Docherty were in a hearty argument about political matters. Mr. Bruce being a prominent conservative, Docherty is a liberal when a person of matter respecting Dr. Docherty was touched upon.

Thereon he is said to have stabbed Bruce with an umbrella. The weapon pierced the unfortunate man's eye and it is supposed that it injured the brain. The injured man was rushed to the hospital district hospital where everything possible was done and he was then removed to his home, where he expired at six o'clock this morning. Dr. Docherty immediately after the assault was arrested by Chief Hushes.

A widow and two children, one son and one daughter survive the deceased.

## DECLARE MARTIAL LAW IN AUSTRIAN CAPITAL

Mob Kills Judge and Wounds Court Officers—Thousands of Troops Surround Palace

(Western Associated Press.)

Vienna, Sept. 23.—Vienna last night was in the hands of the military and authorities. The garrison has been reinforced by other regiments and all the palaces and buildings are guarded.

Two thousand troops surround the Schonbrunn palace. Martial law has been declared in the Ottakring district where serious disorders occurred. This district is now occupied by about 6,000 troops. Disturbances of a minor nature occurred there last evening but the soldiers in control.

An official dispatch from Vienna says the mob stormed the town hall in the adjacent township of Cadenet, killing the judge and wounding the court officers who were engaged in the trial of rioters. Customhouse guards finally dispersed the mob.

## CALIFORNIA WOMEN FIGHT FOR SUFFRAGE

Question Will Be Decided at the Polls Early Next Month—Second Time Issue Has Been Before Electors of State—Defeated by Only 9,000

(Special to The Capital.)  
Step was taken to prepare the women of California for just such an emergency. It was Mrs. Jones Leos Laidlaw, chairman of the Women's Suffrage party of New York city, who by her individual efforts induced the women of California to organize for the purpose of making a fight for suffrage. The ground was well prepared and, when the legislature voted for the submission of the women's suffrage amendment to the state constitution, the organized women of this state were ready to begin the battle.

Fully realizing the importance of a thorough and energetic campaign the women of California sent out on appeal to the friends of women's suffrage throughout the United States and elsewhere. No body did their friends respond to the appeal. From all parts of the world came encouraging letters from men and women interested in the success of the women of California fighting for their rights. J. H. Brady of Pasadena, a retired businessman of great wealth, organized under the name of The Political Equality League a powerful body of prominent men and women bound together by the common desire to aid the women's suffrage movement.

Never was a political campaign in this state fought with greater determination than the one now drawing to a close. The women of California realized the importance of a victory at this time and inspired and encouraged by the agents of the women in other western states, entered upon this campaign with tremendous energy and determination. When the legislature decided to submit a constitutional amendment giving women the right to vote, in a referendum vote on October 10, it did not and the women of the state were disappointed.

More than two years ago the first

Serve FRY'S Cocoa—Your Guests Will Like It.

WHAT drink so suitable to serve guests as FRY'S Cocoa? Elegant, dainty, of exquisite flavor, invigorating—and everybody likes it! When well-made, no other beverage can compare with FRY'S pure, concentrated cocoa. It builds up instead of depleting nerve-strength, as tea, coffee and other mere stimulants do. Be sure you get FRY'S—make it according to directions—and your guests will have a rare treat, indeed.

Remember: "Nothing Will Do But FRY'S"

THE FRY'S Cocoa

Trade Scented by J. S. FRY & SONS Limited, 123 Bannatyne Avenue East, Winnipeg

If the Evening is Warm Serve FRY'S Cocoa ICED!

THIS perfectly delicious drink can be prepared in a minute, if you keep on hand a syrup, made by mixing one-half cup of FRY'S Cocoa, one cup sugar, and one cup of warm water. Stir until smooth. Then boil for fifteen minutes. Cool and add half-teaspoonful of vanilla extract. To serve, allow about two tablespoonfuls of this syrup to a glass, a little chopped ice, and fill glass with cold milk. Stir well. Once you try this exquisite, cooling, satisfying beverage you'll want it often.

All good grocers sell FRY'S Cocoa—get a tin to-day and be prepared.

## EUROPEAN LAGKEY'S INGENIOUS PLAN

INDICATE BY MICROGLYPHIC ON BAGGAGE THE DEGREE OF CENESTROSY SHOWN. (International News Service.)  
Berlin, Sept. 22.—Tourists in European countries must in the future add another small item to the traveling outfit—namely, a pocket square. The reason for this necessary precaution has been divulged in the course of an investigation just carried out among hotel servants.

**PARKDALE**  
1/4 SIZE  
**COOLIA**  
are flexible, fit themselves to the neck, sit close to the slides easily.  
TV Fit  
4 1/2 50c.  
Mey's Store.

Mey's Store.

**HUNTERS!!**  
Nothing more interesting has come out in recent years than the new Hunting Vest. The shells protrude from beneath, so that they may easily be grasped when wanted, even by benumbed fingers; but are held in position so firmly that they cannot drop out. Made like a repeating gun—every time you take a shell out another drops down to take its place.  
You simply must have one. Call and see them while they last.
